Fast-learner, self-motivated, and Blockchain enthusiast looking to change career into software development after 5 years in technical and IT assistant from the general sector. Looking to use my strong foundation in UX/UI Design and Full-Stack web development and newly-gained continuous improvement knowledge to contribute to the innovation and development of software products.

Projects

Personal Website *Static Website*
Built a personal website to showcase my Design and Development skills and keep all relevant information in one place. Hosted on Google Cloud Platform with Firebase. Designed with XD, and built with HTML, CSS(SCSS), JavaScript, and React

QUAD CAPTCHA *WEB APP*
Build a new generation of CAPTCHA to reinvent the wheel from scratch and create something more secure against computer vision algorithms.
Built with Vanilla JavaScript and Node.js

URL Shortener API *WEB APP*
Build a URL Shortener API to shorten long URLs into just 8 characters.
Hosted on Heroku with Git.
Built with JavaScript, React, Node, Express and MongoDB.

Unit Converter API *WEB APP*
Built a unit converter API to convert Metric to Imperial units and vise versa. Hosted on Heroku with Git.
Built with JavaScript, Node.js, Express and Pug.
